ABOUT US

SFVEST is located in Wuyi county, Zhejiang PR, China since 1996, which is covering an area of 100,000 square meters.

In 2011, Anhui Shunfa was established with 20,000 square meters.

In 2019, Myanmar factory was established with 24,000 square meters.

With 27 years of development, SFVEST has more than 1,500 skilled workers in its workforce, the daily production capacity is more than 70,000pcs safety vests, 30,000pcs T-shirts, and 6,000pcs jackets.

With 27 years of experience, SFVEST is firmly established as a leader in the manufacture of high quality, comfortable, stylish, High visibility garments and PPE that meets recognized international standards. We pride ourselves on attention to detail and focus on safety compliance standards so you don't have to.

We work closely with leading suppliers whose expertise and materials provide you the confidence when you need it most. And we're able to deliver the most advanced premium reflective materials to ensure we craft the highest visibility garments possible.

We always draw up new designs and create prototypes, offering you flexibility quality and service you can't get with anyone else. And we know that sometimes you need more than something off the shelf, something made of a different fabric with a different tape configuration or customized for your specific industry. And we manufacture those custom pieces both in China and Myanmar.

Excellent quality, very competitive pricing ensures we offer a market leading service to all customers. It's why we partner with top specialty companies like Costco, Walmart,...

27 years ago we started in Wuyi, today we sell to all over the world with the same mission to provide high quality high visibility apparel for hard-working people like you.

Our pledge to your safety is reflected in the uncompromising commitment to quality, innovation and comfort in every thread and every seam in everything we make and do.

A full-page background image showing a worker in an orange high-visibility safety suit, white helmet, and safety harness. The worker is standing on a metal platform or ladder attached to the back of a white truck. The truck has various equipment, including a spare tire and a toolbox, mounted on its back. The scene is set outdoors, possibly at a construction or maintenance site.

A vibrant city street scene, likely in London, featuring a red double-decker bus and several police officers on high-visibility yellow and blue motorcycles. Pedestrians are walking across the street, and the background shows multi-story brick buildings with shops like 'FIORINI' and a 'LEICESTER SQUARE BOX OFFICE' with a 'HALF PRICE' sign. A black speech bubble in the upper right contains the text 'Make your life shining and safe!'. The bottom left corner has the text 'Sports Safety' in large white letters.

The British Standard is the UK implementation of
EN ISO 20471:2013+A1:2016.
It is identical to ISO 20471:2013 which is withdraw.

Minimum required areas of material
in m² for types A, B3 and AB

	A	B3	AB	A	B3	AB
Heighth of the user	h ≤ 140 cm ^a			h > 140 cm ^a		
Fluorescent material	0,14	—	0,14	0,24	—	0,24
Retroreflective material	—	0,06	0,06	—	0,08	0,08
Combined performance material	—	—	0,14	—	—	0,24
^a If the height range (interval figures as described in EN ISO 13688:2013) includes 140cm (e.g. garment designed for height range from 138cm to 142cm), then the requirements as stated in the column " h>140" apply.

Information Concern RISK SITUATIONS

Risk level	Factors related to the risk level*		Risk level	
	Vehicle speed	Type of road user		
High risk ISO 20471 class 3	>60 km/h	Passive	High visibility	– day and night visibility – 360°(visibility from all sides) – design for form recognition – encircling the torso – quantity and quality for day and night
High risk ISO 20471 class 2	≤60 km/h	Passive		– day and night visibility – 360°(visibility from all sides) – design for form recognition – quantity and quality for day and night
High risk ISO 20471 class 1	≤30 km/h	Passive		– day and night visibility – visibility from all sides – design for movement recognition if applicable (not necessarily encircling the torso) – quantity and quality for day and night (not necessarily ISO 20471) – more freedom in colours and design
Medium risk	≤60 km/h	Active	Enhanced visibility	– night visibility – visibility from all sides – design for movement recognition if applicable (not necessarily encircling the torso) – quantity and quality for night (not necessarily ISO 20471) – no "gadgets"
	≤15 km/h	Passive		– bright colour – piping and/or randomly designed reflective material – any quantity and quality
	≤60 km/h	Active		
Low risk	–	–	visibility	
* Depending on local issues such as weather condition,background contrast, traffic density and other factors, one of these factors may lead to a higher level.
